	1	SEALING DISC AND FILM COMPOSITE FOR A CLOSURE OF A
	2	CONTAINER
	3	
	4	<u>ABSTRACT</u>
	5	A sealing disc and a film composite for a container closure is provided, for
	6	use on a container with an opening bounded by a peripheral edge. The film
L.1	7	composite includes a plurality of layers. An adhesive layer is arranged at least
	8	over a joining surface between the upper layer and the underlying layer.
